

In honor of
The Explosives and Weapons Forum
We present:
The Encyclopedia of Explosives and Related Items

PATR 2700, the Encyclopedia, Federoff, the Bible of Explosives, call it what you will as it has many names. There are few enough books in existence that cover a topic such as explosives, let alone do such a good job as to be a must have reference for anyone in the field. The Encyclopedia is the single greatest work on explosives period. Get it, copy it, distribute it far and wide.
A special thanks goes to megalomania for creating The Forum, to NBK2000 for keeping out the kewls, and to nhamilto40 for ripping the original of this book.
